SDG 3 PROJECT REPORT & PITCH DECK

MindPulse: AI-Driven Micro-Wellness for Students

Scaling student mental wellbeing with personalized 3-minute stress check-ins aligned with academic schedules.

Target: Higher Education

UN SDG Goal 3.4 Target

PROBLEM & CONTEXT

The Student Mental Health Crisis

Exam Burnout & Anxiety

Severe stress peaks during assignment deadlines and finals.

Overbooked Campus Therapy

Long waiting lists prevent timely support when needed.

Generic Wellness Apps Fail

Existing tools are expensive and disconnected from student routines.

Clarity | Desirability | → Start: Viability | Feasibility | ALSO TESTED | Mission | Defensibility | Timing

Lean Canvas | Lean(er) Canvas

PROBLEM

- High stress and burnout levels among college students during exams.
- Long wait times and high costs for campus therapy/counseling.
- Existing wellness apps (like Headspace) are generic and expensive.

+ New Entry

4

EXISTING ALTERNATIVES

- Campus Counseling Services: On-campus therapy (often limited by long waitlists and strict appointment times).
- Generic Wellness Apps: Apps like Calm or Headspace (often feel too broad or require expensive subscriptions).
- Unstructured Coping Methods: Venting to friends, scrolling on social media, or pushing through burnout alone.

3

SOLUTION

- Smart Mood & Stress Tracker: Quick daily check-in that takes less than 30 seconds.
- Personalized De-stress Audio: 2–5 minute guided sessions tailored to current stress levels.
- Peer Support Hub: Anonymous moderated message boards for campus support.

7

KEY METRICS

- Daily Active Users (DAU): Number of daily stress check-ins.
- Retention Rate: % of users returning weekly.
- Student Wellness Score: Self-reported decrease in anxiety levels after 30 days of use.

11

UNIQUE VALUE PROPOSITION

"Hyper-personalized, 3-minute micro-journaling and AI stress check-ins designed around a student's actual class and exam schedule."

5

HIGH-LEVEL CONCEPT

"Duolingo for student mental health—quick daily micro-habits built around your class schedule."

6

UNFAIR ADVANTAGE

Exclusive partnerships with student council boards and campus wellness centers that provide direct access to the student body.

12

CHANNELS

- Campus ambassador programs and student club partnerships.
- Social media campaigns (TikTok, Instagram, Reddit).
- Posters and QR codes on university bulletin boards.

10

CUSTOMER SEGMENTS

Target Audience: College/university students (ages 18–24) dealing with academic pressure.

1

EARLY ADOPTERS

- Final-year university students facing heavy exam workloads, capstone projects, and job interview stress.
- Student council members and campus club leads who actively seek self-care and productivity tools.

2

COST STRUCTURE

- App development and cloud hosting fees.
- Marketing and campus ambassador programs.
- Content creation (paying licensed psychologists to design exercises).

9

REVENUE STREAMS

- Freemium Subscription: $3.99/month (or $30/year) for premium analytics, custom audio programs, and 1-on-1 counselor matching.
- B2B Campus Licensing: Universities pay a bulk fee to offer premium access to all enrolled students.

THE SOLUTION

Three Core Features Built for Campus Life

Smart Mood Tracker

30-second daily stress check-in.

Personalized De-Stress Audio

2–5 minute targeted exercise tracks.

Peer Support Hub

Anonymous student community boards.

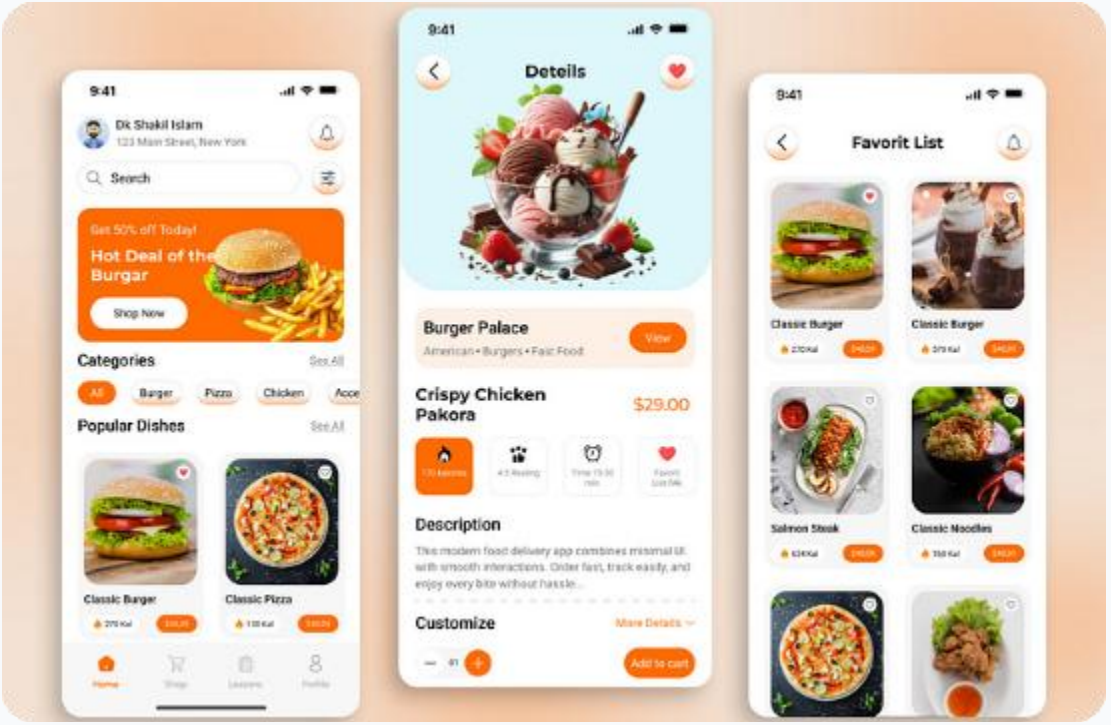

VALUE PROPOSITION & CONCEPT

High-Level Concept

Duolingo for student mental health — quick micro-habits tailored around class schedules.

Unique Value Proposition

Hyper-personalized stress check-ins integrated directly into exam calendars and daily routines.

TARGET AUDIENCE

Customer Segments & Early Adopters

Target Customer Segment

Demographic: University students aged 18–24.

Pain Point: High academic workload and exam anxiety.

Goal: Accessible self-care tools on smartphone.

Ideal Early Adopters

Final-Year Students: Facing capstones and job interviews.

Student Leaders: Active in campus wellness committees.

Digital Natives: Regular users of habit apps.

FINANCIAL MODEL

Revenue Streams & Pricing Strategy

$3.99/mo

B2C Freemium Model

Premium analytics and personalized audio tracks.

Enterprise

B2B Campus Licensing

University annual site-wide subscription contracts.

EXECUTION & OPERATIONS

Cost Structure & Key Success Metrics

Cost Drivers

App Infrastructure: Cloud servers and AI API costs.

Campus Marketing: Ambassador stipends and flyers.

Clinical Content: Licensed psychologist creation fees.

Key Performance Metrics

Daily Active Users: Stress check-in frequency.

User Retention: 30-day returning student rate.

Wellness Score: Self-reported anxiety reduction.

GO-TO-MARKET STRATEGY

3-Phase Campus Distribution Plan

PHASE 01

Campus Ambassadors

Student clubs and QR code posters.

PHASE 02

Social Campaigns

TikTok, Instagram, and Reddit ads.

PHASE 03

Institutional Pilots

University health department partnerships.
